

Job Title:	Offsites Technician (2)	Classification:	Permanent, Union
Department:	Operations	Reporting to:	Offsites S
Location:	Come by Chance Refinery	Closing date:	September 9, 2019
Schedule:	Rotating Shift	Posting Type:	External/Internal

Company Overview

We've proudly served Newfoundlanders with refined products manufactured right here for almost 30 years. Think of us as the company that keeps the province warm and provides the fuel to keep it running too. NARL Refining LP is a crude oil refinery located in [Come By Chance](#) in [Newfoundland and Labrador, Canada](#). It has a refinery capacity of 130,000 barrels per day. At NARL Refining, we don't have a work force. We have a community that's more than 600 strong. Our employees come from the towns surrounding the refinery and from all over the world. They are operators, engineers, craftspeople, managers, and drivers. They are also scout leaders, education mentors, and healthcare volunteers. Our highly skilled employees transform crude oil into some of the cleanest fuels on the world market. It's a job that requires the greatest care and safety. Safety training and performance at NARL Refining is second to none – it's a culture.

Offsites Technician

The successful candidates will be directly involved in blending, storing and transfer of all petroleum products. To achieve this, they will become proficient in operating and monitoring the assigned posts in the Offsites and Jetty area, including many items of large process equipment. The successful candidate will be required to understand and follow plant operating procedures and to comply with company policy to ensure the plant continues to meet regulations and its corporate goals.

Responsibilities:

- Be actively involved in HSE and business risk reduction by promptly reporting issues and taking action when needed.
- Master the understanding and operation of process equipment including pumps, compressors, control systems, gauging and sampling systems.
- Safely and efficiently prepare equipment for maintenance
- Diligently monitor the assigned process area
- Troubleshoot, report and resolve process performance issues.

Qualifications:

- Graduates of a Mechanical/Petroleum Engineering Technology program
- 3rd Class Power Engineering Certificate, 4th will be considered
- Able to work shift or rotating shift as required
- Excellent organizational skills and communication
- Valid Class 5 Drivers License is required.

Free Employee and Family Assistance Program • Free on-site parking • Employee appreciation events • Company shuttle from Refinery to St. John's and back daily. (Employee is responsible for transportation if bus is not operating). Eligibility is based on status of role.

North Atlantic is committed to Employment Equity. Accommodations during the recruitment process are available upon request for candidates with disabilities.
